

All About Underwater Sounds and Their Study

EAVESDROPPING ON FISHERIES

MAR7 AUDREY LOOBY

9 AM PACIFIC TIME

Dr. Audrey Looby is a Banting Postdoctoral Fellow at the University of Victoria and one of the co-leads of FishSounds. Her research focuses on soniferous species diversity, passive acoustic monitoring applications, and noise pollution. She is also an avid science communicator, seeking to raise public awareness of underwater sounds and their importance globally.
